

FLYING CIRCUS ACADEMY

The FLYING CIRCUS ACADEMY (FCA) is an Erasmus+ funded further training programme for circus trainers and percussionists that refines non-verbal learning and teaching methods and illustrates them through video tutorials.

The short video tutorials assemble the teaching methods from the last year's joint work of the project partners from Cambodia, Tanzania, France and Germany which are professionalized through continuous training.

This will ensure the sustainable development of specialised knowledge and support the individual pedagogical approach on the field.

International experience shows impressively how artistic mediation of circus disciplines contributes to strengthen and restore the social skills of disadvantaged young people.

Circus art and the artistic work influenced by exchange and trust stimulate and encourage the individual personality development as well as a wider social involvement through physical and mental training methods.

This makes the FCA tutorials very suitable for projects fighting against a growing threat of social exclusion and difficult living conditions of disadvantaged migrants and refugees in EU and worldwide.

Please find further information on our website:
<http://flying-circus-academy.net>

The FCA video tutorials of the following disciplines acrobatics, trapeze and silk, juggling, diabolo, Samba Reggae percussion are available on our FCA Youtube channel. You can also find us on fb.
